PARIS, WEDNESDAY, JUNE 6, 1984

ESTABLISHED 1887

By Michael Dobbs

WEATHER DATA APPEAR ON PAGE 14

Washington Post Service OMAHA BEACH, France -On Wednesday, the 40th anniversary of D-Day, President Ronald Reagan will descend by helicopter on a field planted with row after row of white crosses, each marking the grave of a U.S. ser-

There is no more powerful symbol of America's links with Europe than the cemetery and the nearby 50-mile (80-kilometer) strip of sandy beach on the coast of Normandy.

It was here that the Western Allies under the supreme com-mand of General Dwight D. Eisenhower aimed a long-awaited blow that foreshadowed the end of Hitler's Reich. It was here that the United States was formally

Memories of Normandy: Preparations, moving in under fire, a WAC's role. Page 6.

invested with the global responsibilities of a world superpowe But Europe, America and the world have changed since 1944. The young men who waded ashore here are now between 60

and 70 years old. In Western Europe, there is a perception that the priorities of America's new leaders are shifting away from the Old Continent. In America, there is a feeling that the Europeans should stop complaining about Uncle Sam and do more for their own defense.

America's erstwhile enemy, Germany, has become a friend. The wartime ally, the Soviet Union, is now an adversary.

The significance of D-Day in 1984 lies in the psychological counterweight it provides to political uncertainty that has arisen because of the change in generations and the shift in the global balance of power.

That is the view of Maurice Schumann, who served as a French liaison officer with a Brit-

D-Day Plus 40: Fighting for Europe Is Again an Issue

and later was foreign minister un-der Charles de Gaulle.

"This year's D-Day ceremonies are bringing the president of the United States back to the beathes along with thousands of Americans," Mr. Schumann said. "This is going to mean an essential and perhaps decisive contribution to the restoration of the balance in American foreign policy between the Pacific and the Atlantic."

"The message of history" contained in D-Day, according to Mr. Schumann, is that it would be "snicide" for the United States to contemplate turning its back on

Apart from the war memorials

along the Normandy coastline, and remnants of Hitler's "impregnable" Atlantic wall, there ure few visible signs of the battles that took place 40 years ago. Soon after D-Day, German

ish commando unit on D-Day clearing the sand dunes of land and later was foreign minister unweapons. Today it is only the beaches' wartime code names Utah, Omaha, Gold, Juno and Sword — that conjure up memories of the carnage that occurred

> What accounts for the almost compulsive fascination that these places exercise is not the visual reminder of war, but the reminiscences of the U.S., British and Canadian soldiers who participated in D-Day as well as the French they came to liberate.

"D-Day means something to everybody who speaks English," said John Keegan, a British military historian and author. "It's one of those phrases that enjoys a universal currency. People who arrived in Normandy on D-Day as opposed to the day afterward are tremendously proud of it and can be fanatical about that being recognized. It's the case of a day

having a luminosity of its own." American memories of D-Day by many of the soldiers because the turbulent weather in the English Channel, bets as to who would make it and who would not, parachutists searching for each other in the dark or sinking helplessly into swamps under the weight of their own equipment. buddies blown apart by land mines, the incapacitating fear produced by wading onto a beach under enemy fire.

The predicament of many of the Americans who landed at Omaha, scene of the bloodiest German resistance, was summed up Colonel George A. Taylor, who told his soldiers: "Two kinds of people are staying on this beach — the dead and those that are going to die. Now let's get the hell out of here." The most abiding recollections

of D-Day for local French people are of the sight of an armada of 5,000 ships stretching across the horizon, of night skies lit up by flashes of bombs and artillery shells, of days spent crouching in ditches and hedgerows while Al-lied planes bombed everything that moved.

For members of the Resistance, there is the memory of the **British Broadcasting Corporation**

REGINA, Saskatchewan — The school here where Canada trains its legendary Mounties is a shadow of its former self. The dormitories are nearly deserted; the number of instructors has been cut from 90 to 24; and a horse has not resided on the premises for a generation.

"We have no recruits to train," said Super-intendent David Pearce, director of training, with only slight exaggeration.

Just 48 men and women are taking the six-month training course to become a full men-RENCHE PRIVILIPATER AND A STREET ber of the Royal Canadian Mounted Police, compared with 700 several years ago. The principal reason for the drop is that the 13,071 current Mounties like their jobs too

RECEPTION In addition to being a sort of Canadian national icon, the Mounties act as the local and provincial police in most provinced well as serving Bureau of Investigation does in the United States. The famous scarlet jacket is worn only for ceremonial occasions, and horseback riding is limited to volunteers staffing the force's famous "Musical Ride."

year. Now one-tenth that many move on, largely because a good job is hard to find during the recession. The starting salary of a Mountie is 25,740 Canadian dollars (about \$19,800), and Canada's unemployment rate exceeds 12 percent.

Several provinces have reduced the number of Mounties they use and increased the number of local policemen, who are less expensive. Budget cutbacks by the federal govemment have also hurt.

One thousand applicants who have already undergone medical and other tests and been judged fit for service are waiting to be called. Nine thousand other applicants are in line sehind them. Residents of Regina, which became the

Mountie headquarters in 1883, appear befuddled. "It seems like a ghost town out there," a wheat farmer said of the Mountie school just west of town: "It's never been like this." People here are grateful for one thing: Speed traps, which were once common be-cause of students practicing, have become

relatively rare. A Canadian government plan to increase graduates, and many have advanced degrees.

School for the Mounties Falls on Hard Times Traditionally, about 4 percent of Mounties the proportion of native French speakers in have left the highly modernized force each the force, a plan that is a priority in all government agencies, has been endangered by the decision of almost all the present Mounties not to move on. Most Mounties are native English speakers. Legislation says that by 1993, 20.8 percent

of the force must have French as their first

language. But officials in Ottawa say the low

attrition rate means the force is unlikely to be

able to increase its 14.83 percentage of French speakers soon. A 10-year drive to increase the proportion of women in the force has also been stalled, although half the students at the Mountie school are women. Slightly over 3 percent of Mounties are women. Only two bave reached

the rank of corporal.

Qualifications to become a Mountie have changed considerably since the turn of the century, when recruits simply had to be under 40, single and able to read and write. Mounties today must be Canadian citizens. at least 19, high school graduates, hold a valid

English or French. The heightened competition has made the qualifications far higher. Many are college

driver's license and be proficient in either

In the Gulf, Kuwait Is the Most Vulnerable to Iran's Escalation

By Jonathan C. Randal

KUWAIT — The virtually defenseless city-state of Kuwait appears to be the most likely victim if Iran decides to expand its retaliation for Iraq's largely successful campaign to reduce Tehran's oil exports. In the view of analysts here, Iran considers it unlikely that any of the major powers would come to

Even if Iran launches its long-rumored ground offensive in the hope of ending the war against Iraq, Kuwaitis and diplomats are convinced that Kuwait remains an obvious target for Tehran's retribution in the Gulf's tanker war.

With Iranian oil exports down as much as twothirds from the normal daily level of 1.8 million' barrels, Tehran could be expected to strike somewhere. Iran has warned Saudi Arabia, Kuwait and the other Arab members of the Gulf Cooperation Council to stop subsidizing Iraq, which reportedly has been

fied with its irregular retaliatory attacks on shipping on the Arab side of the Gulf every time Iraq hits vessels in Iranian waters.

Kuwait has a population of only 1.6 million. From an Iranian military standpoint, its vulnerable oil installations are near. From the political standpoint

NEWS ANALYSIS

neither the United States nor the Soviet Union is likely to come to Kuwait's defense.

A European diplomat articulated what many Kuwaitis whisper privately: "The Reagan administration is prepared to do a lot to avoid getting involved here in an election year."

Washington's position was underlined last week by fired Stinger anti-aircraft missiles. In what some analysts consider an optimistic assumption, the United Sumni

Analysts reason that Iran cannot for long be satis—States said it expects that Saudi Arabia would defend through Iranian influence on the large numbers of ed with its irregular retaliatory attacks on shipping Kuwait from attack.

Shifte Moslems in the country.

Despite the anti-American rhetoric of Iranian leaders. Tehran's military responses have been careful and apparently designed to avoid embroding the super-powers in the 44-month-old war.

Iran has not struck U.S. or Soviet vessels that regularly unload materiel in Kuwaiti ports for overland delivery to Iraq, nor is Tehran likely to risk U.S. supplies for Japan and Western Europe. intervention by attacking Saudi targets, diplomats

Kuwait is the only Gulf Cooperation Council state to have diplomatic relations with the Soviet Union and these ties have done little to endear it to the Kuwait has a defense treaty with Britain, which,

within weeks of Kuwait's independence in 1961, brought an aircraft carrier to dampen Iraqi claims on

an unenthusiastic response when Kuwait sought to follow Saudi Arabia in the purchase of U.S. shoulder-of Iran at last week's UN Security Council debates on the shipping war reflected fear that if Iraq loses, the in the Kuwaiti desert to display Tehran's displeasure Sunni Moslem rulers of Kuwait could collapse with aid to Irao

To some analysts, Kuwait is irrelevant to the economic future of the West. One European diplomat argued that the United States, by reducing its dependence on Gulf oil to three percent of imports, now only sees its role similar to that of the 1950s and 1960s when the main concern would be to safeguard Gulf

The 24 countries of the Organization for Economic Cooperation and Development, the Western industrialized world grouping, have an average 98-day supply of oil stockpiled. Even if deprived of half the daily Gulf production of 8 million barrels, the shortage over four months would amount to only 10 days of those reserves, according to diplomats.

The Kuwaitis now regret that their main power and desalimization plants, refinery, petrochemical complex and other key installations are all clustered at one

Infiltrators Caught on Golan Heights JERUSALEM (NYT) - The Israeli Army announced Tuesday tha four Arab guerrillas were captured in the southern part of the Golar Heights after having broken through the fence along the Syrian-Israel

It was the first reported infiltration from Syria in many years, and i was considered significant in view of past Syrian restrictions on the use o its territory by guerrilla groups for terrorist attacks against Israel. The Israelis have a policy of retaliating against countries that allow such

The army said the four armed infiltrators, aged 16 to 21, cut through the fence and were spotted about two miles inside the Israeli border. On was wounded, and the others surrendered. Their intention was to take civilians hostage, according to an army spokesman.

Israeli Wounded in Cairo Shooting

JERUSALEM (UPI) - An administrative attaché at the Israel Embassy in Egypt was shot and wounded in the arm Monday night outside his home in the Cairo residential suburb of Maadi, the Israe Foreign Ministry said Tuesday.

The ministry said the Israeli, Zvi Kedar, was fired on from a passing

car. He was taken to a hospital and later released A ministry spokesman said Israel notified Egyptian authorities, wix began an investigation.

Botha Gets Cool Reception in Bonn

BONN (AP) - Prime Minister Pieter W. Botha of South Africa received a chilly reception Tuesday from Chancellor Helmut Kohl of Vest Germany, who asked that apartheid be dismantled and violations of

human rights stopped in the white-ruled republic.

Mr. Kohl, who did not shake Mr. Botha's hand as the two leaders met, used the meeting to criticize South Africa's policy of separation of the races, a West German government statement said. But the chancellor described as encouraging South Africa's attempts to reach agreements with its black neighbor states, especially recent agreements with Angola

Mr. Botha's visit to West Germany and West Berlin, the fourth stop on an eight-nation European tour, is the first by a South African prime minister in eight years.

Ex-Rumasa Chief Loses Court Round

FRANKFURT (Renters) - José Maria Ruiz Mateos, a fugitive financier and former head of Rumasa, Spain's largest business empire. was a step closer to extradition from West Germany following a court

decision here Tuesday.

Mr. Rniz Mateos, facing charges of fraud and embezzlement in Spain, was arrested at the request of Interpol in Frankfurt in April. He has been in custody since then, awaiting a decision on extradition requested by

A court spokesman said it ruled there were no objections in principle to extradition proceedings and that they would go ahead unless Mr. Ruiz Mateos appealed. The 53-year-old financier left Spain after Rumasa, which has interests in shipping, hotels, chemicals, banks and chain stores, was taken over by the government in 1983 to prevent its collapse.

For the Record

A Czechoslovak dissident and editor, Jiri Gruntorad, 31, who is serving a four-year term for publishing underground literature, got an additional 14-month sentence from a Czechoslovak court for giving "false testimony" that he was beaten by a prison guard, emigre sources in Vienna said

Two Polish policemen pleaded not guilty Tuesday to charges of involvement in the May 1983 death of Grzegorz Przemyk, a student seen by many Poles as a victim of police brutality. An ambulanceman, who confessed in January that he had inflicted possibly fatal blows on Mr. Przemyk, also told Warsaw's provincial court that his confession was false and made under pressure. (Reuters)

Javier Pérez de Caellar, secretary-general of the United Nations, arrived in Cairo Tuesday at the start of a 10-day, five-nation Middle East

tour that will include talks on Arab-Israeli peacemaking and the Iraqi-Iranian war. He called Egypt the "key country for the solution of the Middle East problem." (UPI, AP)

Zhang Aiping, China's defense minister, leaving Beijing Tuesday on a monthlong rip to France, the United States, Canada and Japan, said that

China wants to buy advanced weapons and military technology from them as part of a drive to modernize its armed forces. (Reuters)

The American space shuttle Discovery successfully tested its main engines Tuesday, cleaning the way for its scheduled June 22 first flight. The craft, the third in the shuttle program, is expected to be in orbit with its crew of six for seven days. (AP)

Reagan to Offer Allies A Joint Oil Crisis Plan

By Robert D. Hershey Jr. New York Times Service

WASHINGTON - President Ronald Reagan is taking to the economic summit meeting in Lon-don a U.S. plan calling for a joint allied strategy in case of a major oil disruption in the Gulf, according to a State Department official.

The plan calls on Europe and Japan to draw on their own stocks of crude oil quickly to avoid a sudden shortage in wholesale and retail markets. Such a response might be made without waiting for world oil supplies to fall by 7 percent, the point where an existing oil emer-gency agreement would be activated. That agreement, administered by the Paris-based International Energy Agency, was drafted after the 1973-74 Arab oil embargo.

for allied governments to request that oil companies sharply limit purchases in the spot market to Thursday takes place as persisten avoid driving up prices and to take attacks on shipping in the Gulf other steps to discourage industrial hoarding of fuel and panicky buy-

U.S. Veteran Again Scales Cliff of Fire in Normandy

POINTE-DU-HOC, France - The first time Herman Stein climbed this 100-foot (about 30-meter) cliff face, there were Germans at the top throwing down hand grenades and raking the narrow beach beneath with machine-gun fire. Artillery shells roared overhead and the sky seemed to rain great chunks of earth.

On Tuesday, Mr. Stein, 40 years older, clambered up the almost vertical cliff again — to the whirring of television cameras and the cheers of fellow veterans from two U.S. Ranger battalions gathered on the

Of the original 225 Rangers assigned to capture a German gun emplacement on Pointe-du-Hoc on D-Day, less than half made it to the top. And of those only 90 were able to bear arms by the end of the day. Rangers who reached the top discovered that the guns they had been ordered to silence had never been mounted.

On Wednesday, President Ronald Reagan will dedicate a new monu- handguns and not heavier arms. ment to the Rangers who died at Pointe-du-Hoc and greet the survivors.

The study outlines the unusual

was leading in California and New taken before the nationally televised debate Sunday night, and sharp shifts in voter sentiment have occurred over the weekend before important primaries this year.

Mondale strategists, independent Democratic analysts and some advisers to Mr. Hart have agreed that Mr. Mondale could seal the nomination by winning the two states. Most analysts also say that the former vice president can hang on to claim the nomination simply by winning one of them.

The United Press International delegate count shows Mr. Mondale with 1,733 delegates, Mr. Hart with 973 and the Rev. Jesse L. Jackson with 327. Another 58 delegates are pledged to others, and 242 remain uncommitted. A total of 1,967 is needed for nomination.

Mondale aides said their final tracking polls in New Jersey this weekend showed a lead of seven to eight percentage points for the for-mer vice president. Mervin Field, the California poll taker, released a state survey that showed Mr. Mondale leading Mr. Hart 41 percent to 34 percent, with 15 percent for Mr. Jackson and 10 percent undecided. The New Jersey tracking polls and

4 U.S. Airports Selected For Sales of Time Slots

By Douglas B. Feaver

Washington Post Service WASHINGTON -- Four heavily used airports in Washington. New York and Chicago were selected by the Department of Transportation Monday for a proposal to let airlines buy and sell takeoff and landing positions where a shortage of time slots has created

Under the proposal, a buyer and seller could make a deal on an exchange without government interference. The initial plan would apply to Washington National, Chicago O'Hare and New York's LaGuardia and Kennedy airports. However, if adopted, it could be

used nationwide, particularly in Atlanta, Denver, Los Angeles and St. Louis. The proposal would apply only to major airline slots, not those reserved for commuter airlines or

for military, business and pleasure flights. In the future, however, commuter airlines may be allowed to purchase slots from major airlines, but not vice versa. The government also wants to know whether cities, banks or other entities not connected to aviation

should be allowed to buy and sell The airline industry has histori-

whereabouts were not known. Oth-

slots, although some airlines disagree. "Our hope is that the greed of the airlines may overcome their

antipathy to free markets," a U.S. government official said. The Federal Aviation Administration plans hearings on the proposal in June in Washington, Chicago and San Francisco. There is no timetable for its adoption, but

hopefully before there are further scheduling deadlocks. Some airline executives have estimated the value of just one slot for example, an 8 A.M. takeoff from LaGuardia - in the hundreds

the agency said it hopes to com-

plete action within three months,

of thousands of dollars. Critics have argued that slot sales would let strong airlines feast on the weak by using cash to buy prime takeoff and landing times. Further, there is concern that new airlines would never be able to buy takeoff and landing rights needed for serious competition. Existing airlines would retain current slots at no cost.

The Federal Aviation Administration and the airline industry have not found a satisfactory method of allocating slots since airline deregulation in 1978.

Until then, a committee of airlines amiably decided slot issues. Since then, the committee has deadlocked on several occasions and is deadlocked now on a slot question at LaGuardia. The govemment wants to avoid imposing an arbitrary solution.

Accord in Philadelphia Suit The Associated Press
PHILADELPHIA — The fire

department has agreed to fill 12 percent of its next 1,250 positions with black firemen, ending a 10yearlong civil rights suit, officials announced Monday.

The Stopover in Managua

American secretary of state called it - "constructive." Direct contacts of themselves will not end a bitter dispute. But if pursued, they can at least impel antagonists to stop shouting and start talking about settlement terms. In Central America especially, that is something - and for the Reagan administration, that would be something new.

Why did Mr. Shultz detour to Managua on the way home from the inauguration in El Salvador of President José Napoleón Duarte? Put the question of sincerity aside for the moment; there are opportune reasons for President Reagan to promote this "mission of peace" in an election year. What does he have to lose? If talks go forward, Mr. Reagan neutralizes Nicaragua as a campaign issue. If they founder, he can blame the Sandinists.

Other tactical reasons may explain Mr. Shultz's stop at Managua airport. The House has refused to vote \$21 million in "covert" aid to anti-Sandinist rebels in Nicaragua. With talks under way, the White House can contend that ending U.S. support for the secret war robs Mr. Reagan of a vital bargaining card.

Then there is Mexico, whose president, Mi-

guel de la Madrid, urged just such an initiative during his Washington visit late last month. Mexico fears that a wider war in Central America will radicalize the region and inflame insurgency on its own borders. Hence Mr. de

For all its fortuitous timing. George Shultz's la Madrid's urging that Washington recognize surprise stopover in Nicaragua is just what the value of Mexico and the other Contadora mediators, Colombia, Panama and Veneznela.

Mr. Reagan is too good a politician to shrug off so important a visitor. So his secretary of state found time to go to Nicaragua for "quiet, direct, candid, frank" discussions. Mexico now has upgraded its relations with El Salvador. something Washington has long wanted. This tacit reciprocity is the stuff of diplomacy, and may indicate that the State Department has become a real player in the regional conflict.

Nicaragua has named its negotiator for further talks: Deputy Foreign Minister Victor Hugo Tinoco, reputedly a hard-line Sandinist. He will meet, date unspecified, with Harry Shlaudeman, the president's special envoy to Central America, an old hand in Latin diplomacy. Wary Sandinists want a third party, presumably Mexico, to sit in as a witness, and why not? A third-party accounting can protect the interests of the United States.

The test of the Shultz mission lies ahead. Nicaragua wants an end to the "contra" war and a resumption of normal trade with the United States. The United States, in turn, wants Nicaragua to stop helping leftist guerrillas elsewhere - though it is not clear if that would be enough. Mr. Reagan may not be willing to accept, on any terms, a regime he denounces as Communist. But diplomacy, once begun, can build up its own steam.

- THE NEW YORK TIMES.

Those Unsettling Deficits

becoming an important source of instability in the American economy. The April figures, just published, show the deficit roaring along at a rate of \$130 billion a year, a level that, if it had been predicted six months ago, would have been derided as alarmist.

These deficits will not continue indefinitely. But the unsettling thing about them is that no one has any idea when the pattern will break. It depends on the willingness of foreigners, as they sell goods in the United States, to keep holding more and more American dollars. At some point, presumably, they will decide that they have enough and refuse to finance U.S. trade deficits any further. Perhaps they will decide that they have more than enough, and

begin selling dollars for other currencies that look safer or more profitable.

What might precipitate that? It is unpredictable. It might be a rather minor event — one bank failure too many, perhaps, or a strike. The important thing to keep in mind is that when it happens, an uncomfortable adjustment will follow. It will mean a drop in the dollar's exchange rate and a further rise in interest rates. If the country is lucky it will happen gradually. But there is no guarantee that it will not happen the other way.

In the meantime, there are substantial consequences for the American economy. Throughout the postwar years, the United

abroad that return a steady stream of foreign income. These investments are now being rapidly offset by the accumulation of foreign investment in the United States that is helping to finance the trade deficit. American net foreign investment, and net foreign income, are falling — to the detriment of the standard of living. U.S. citizens ought not be under the impression that these foreign trade deficits are free. Americans are paying for them out of the capital that the United States has slowly built

The trade deficits are not, after all, mere financial abstractions. They measure the trouble that American industries are having competing with foreign producers, both in the United States and abroad. The reason for it is the very high exchange rate of the American dollar. The dollar is high primarily because American interest rates are high. And if you look for the reasons for the high interest rates, you will find a trail leading directly to the Reagan administration's huge budget deficit.

The causes of that dangerously lopsided trade balance do not have much to do with the alleged machinations of foreigners, or their trade policies, or their currency manipulation. The reasons for it do not lie in Japan or Western Europe. The American trade deficit is the result of bad policy in Washington.

-THE WASHINGTON POST.

Other Opinion

Looking Back on D-Day

To the people of the United States, D-Day meant and must still mean a magnificent accomplishment by a brave people united in a glorious cause. It was a monstrous gamble by men who dared to make huge decisions, and was a mighty success. It hastened the end of the Hitler horror and of World War II.

We have never been so united as a people since, nor felt such pride nor such a sense of nationhood. We were so absolutely certain our enemies were evil and we were good. We were

But forty years is a long time and outlooks change. We do not hate our friends and allies, the Germans and Japanese. As we celebrate D-Day, we are a little embarrassed about how the Germans feel about it. We are embarrassed about a lot of things these days. Our enemies are not as evil, nor are we as pure. It is good to remember, briefly, a more innocent time, when we were united and strong and brave and absolutely certain of the justice of our cause. - Syndicated columnist Otis Pike.

Any German, looking back on World War Il and knowing what we know now, is in an irresolvable moral and emotional bind. Clearly Hitler had to be defeated and Nazism had to be wiped out, but that could be achieved only by the defeat and destruction of Germany and the death and maining of many Germans. Being patriotic in a genuine sense meant being against the Germany Hitler had built, thus forcing Germans into a position of divided loyalty. On D-Day any "good" German had to rejoice in the Allied success, even though it meant death for many of his countrymen.

Today, the rows of graves in Normandy do not differentiate between nationalities and ideologies, political goals and military glory. In them lie the bodies of German soldiers and of Americans and of volunteers from other countries, who fought on both sides. The graves are a simple, stark reminder that the cost of tyranny and freedom is very high. That is the somber message of D-Day.

 Herbert Arnold, a native of Germany in The Hartford (Connecticut) Courant.

Reagan Waves an Olive Branch

President Reagan has waved an olive branch, albeit a smallish one, in the direction of the Kremlin and has given President Cher-nenko, the Soviet leader, an opportunity to stop sulking and reduce the current dangerous level of East-West tension. It is hard to envisage that the Soviet Union will wholly reject a proposal that has been high on its own agenda. But its contempt for Mr. Reagan has reached the point where it may not be able to see where lie its best interests.

- The Daily Telegraph (London).

President Reagan's speech was a wise start to his European visit and a helpful prelude to the economic summit due to take place in London. For the European objections to Mr. Reagan have not always been so much to his policies as to the uncompromising nature of his language toward the Soviet Union: as if he were conducting a moral crusade rather than seeking to maintain a balance of power. In at least half his speech he seemed deliberately to seek to put that behind him.

- The Financial Times (London).

FROM OUR JUNE 6 PAGES, 75 AND 50 YEARS AGO

1909: The Tickless Electric Clock LONDON - A clock which does not tick, which is never in need of winding, has no spring and no escapement, is the happy invention which Mr. Sigismund Kutnow had the to avert the strike of steel workers contemplathonor of submitting for the King's inspection. Mr. Kutnow has called his invention the Eureka electric clock. In an interview [on June 6] with a correspondent of the "Evening News." he foreshadowed the end of all clock winding and the doom of the time-honored tick. In the usual type of electric clock, the current winds the spring, in the Eureka, it acts directly on the Steel Institute have trouble in accepting the wheels. It is driven by one dry-cell battery. President's invitation to put their knees under placed inside the works. Mr. Kutnow stated that one of his models had been running for workers are ready on June 16, to shut down

three years with the same battery.

1934: A 'Run-Around' on Steel Talks WASHINGTON — The revelation by General Hugh S. Johnson, National Recovery Administration administrator, that negotiations ed the creation of a labor board for that industry, drew fire from union leaders, who insisted they had heard enough of boards. The NRA has come to mean National-Run-Around, "Junion leaders) said. "We object to General Johnson hanging more dead cats on the President. To Approach an Angry Bear: Be Respectful, but Firm

WASHINGTON — A test of wills is taking place between the leaders in the White House and the Kremlin — a test that the United States cannot afford to lose. Vacillating enemies get nothing but contempt from the Russians. Yet an enemy who staunchly refuses to treat them with respect cannot expect to get much from them either.

President Reagan noted last week that "there is no more important consideration than the development of a better working relationship with the Soviet Union." Yet antagonism between the United States and the Soviet Union is clearly on the rise. The

GENEVA — U.S.-Soviet rela-tions will be improved only if both sides want them to be. But first

the two countries must break out of

the pattern described by political and

military confrontation, growing sus-

picton and a spiraling arms race.

Many people assume that if only
the leaders of the superpowers came

to know each other, both sides would live happily ever after. The two na-tions, after all, have many shared

concerns. They have cooperated, both in war and in peace, on a wide

range of problems.
In fact, the antagonistic elements

in the relationship are quite real and

tangible. They stem from differences

in systems of ownership and societal structures, opposing ideological values, and in perceptions and misperceptions of each other's intentions.

And there are, of course, divergent

geopolitical interests.

Nevertheless, the importance of the present lack of confidence should

not be underestimated. There are

ways the two powers could proceed

to generate a degree of initial confi-

that the Russians have gone out of their way to portray an unduly gloomy picture of the superpower relationship in order to increase political troubles for Ronald Reagan during the election year.

To some degree, this is correct. The Kremlin's apocalyptic warnings are exaggerated and self-serving. The Soviet case is so overdone, presented with all the finesse of an angry bear, that one is tempted to dismiss it out of hand. That would be a mistake.

dence, which is indispensable to any

improvement of the political climate.

First, the two powers could make parallel statements reaffirming a principle included in the U.S.-Soviet accord signed by Leonid Brezhnev and Richard Nixon in Moscow on May 29, 1972. That principle reads:

"The U.S.A. and the U.S.S.R. have a special responsibility, as do other countries which are permanent members of the total countries of the document of the countries of the contributions of the con-

Council, to do everything so that con-flicts or situations will not arise which would serve to increase inter-

national tension. Accordingly, they will seek to promote conditions in

which all countries will live in peace and security and will not be subject to

Second, the two major powers,

with a view to improving their com-munications, forestalling misunder-

standings and building mutual confi-

dence, might consider setting up a Bilateral Political Consultative Com-

mission, patterned in its essential

Trouble for an Alliance That Has Lost Its Spirit

WASHINGTON — President Reagan's sentimental homecoming to Ireland was a warm reminder of America's European heri-tage — and also a grim reminder of Northern Ireland's bitter conflict and of the vulnerability both of Americans and of their ancestral lands to the new scourge of terrorism. The president's homage to the heroes of D-Day recalls a grand alliance against one form of tyranny, in sharp contrast to today's less-concerted alliance against a different tyranny.
Next comes the London summit of seven of the most powerful leaders in the industrial world. The forecast is. for limp and languid responses to a gathering economic storm that may come to constitute, in its own way, no

less a threat to their security than communism or terrorism. Thus do this week's Events in Europe confirm how little there is left of the communal spirit and shared sense of purpose that was so much in evidence on the Normandy beaches and in the towering Allied successes: the Marshall Plan, the North Atlantic Treaty, Bretton Woods, the defense

of West Berlin. The Iraq-Iran war is an undeniable threat to the energy resources that are essential to the NATO defense machine. Yet there is no NATO strategy. After a meeting of the organization's foreign ministers in Washington last week, France's Claude Cheysson reported that nobody had even suggested that NATO, as such, could get involved "beyond its geographic area."
The London economic conferees

are unlikely to do much more than mumble about how they might work together on the crushing Third World debt problem, while agreeing to dis-agree on the extent to which U.S. economic policy is to blame for Eu-

But suppose the world's economic experts are right about the magnitude of the menace to the well-being of the noncommunist world in the years just ahead. Suppose the revolutionary forces of Islamic fundamentalism do pose the mortal peril to the Gulf that so many authorities on the region foresee. Suppose that Ronald Reagan is even half right about the Soviet challenge to American and (by exten-sion) allied security in its interventions in Central America and in its nostalgia in Mr. Reagan's trip to worldwide adventuring. Add the growing terrorist phenomenon, and his enemies in disarray. They buzz surely you have an agenda worthy of some larger expression of the spirit that drove the postwar alliance.

So why is it that even the mention of alliance "disarray" is a room-emptier? It is tempting to lay it off on lack of leadership. Where is an Arthur Vandenberg, the Republican senator from Michigan who responded so nobly to Harry Truman's reach for the

great French visionary whose lonely struggle for a self-sufficient, tightly integrated United Europe helped cre-By contrast, the current crop of allied leaders does look a little thin. But Harry Truman commanded little

the time he was presiding over the launching of the great postwar enterprises. As a personal inspiration to Europe's leaders he was probably about on even terms with Ronald Reagan today. Nostalgia is not the answer, unless you wish to include nostalgia for an industrially flatrened, food-short Western Europe,

The dangers today are clear enough --- but they were.

for Stalin, and for a Berlin blockade for all that galvanized the Allies. Rather, it is the particular nature of the circumstances that explain why gatherings of allied leaders nowadays are so short on spirit, let alone substance, and so long on pomp. The dangers are clear enough — but not present in the way they were nearly

hum, so next year will be time enough to deal with the international repercussions of the built-in U.S. budget deficits. European unemployment is unacceptably high and the Europeans are just beginning to discover how far behind they are in the high-technology competition with the United States and Japan; but things are not yet so bad that the choice has to be made between a collective effort to catch up and a surrender behind protective trade barriers. If the Gulf oil artery is severed, we can hope that it will not stay severed. The Russians are in a nasty funk — but nobody knows why, or what to do about it.

out arms control. But they probably believe that if necessary the Russians can get along without negotiated

Meanwhile, the Russians persist in

their ill-tempered defiance of allies and adversaries alike. President Rea-gan is quite mistaken in his assertion that the Russians "haven"t taken an-

other inch of territory during his tenure. It was, after all, Soviet sup-

port that enabled the Syrians and their Lebanese allies to inflict the most humiliating and costly military setback that the United States has

President Reagan is clearly understating the Soviet challenge — and also virtually inviting the Russians to by harder. How so? If two more Soviet submarines do not make a difference to the White House, Moscow surely will be tempted to increase the number. By asserting that

the Russians are in no position to increase "their military production any place beyond where it is right now," the president simply challenges them to prove he is wrong.
The Russians are not seeking an artificial confrontation with the United States. They remain cautious and pragmatic in approaching Third

World trouble spots. There is no major crisis on the horizon. Yet, if a crisis does occur, the defiant mood in Moscow and the lack of communication with Washington may make it very difficult indeed to avoid miscalculation and escalation. In this, the situation is as grim today as at any time since the Cuban missile crisis. Meanwhile, Moscow seems ever

more heavy-handed, leading to several unusual incidents in the last two months. A Soviet submarine closely trailed and then ran into an American aircraft carrier. Soviet-controlled MiGs fired at a U.S. military helicopter lost in Czechoslovak airspace. Au American diplomat was beaten up in Leningrad. Accidents? Perhaps. But it is increasingly hard to dismiss the impression of growing Soviet reck-lessness and belligerance. The president is right that this is

not the time to make conces That would only reward the Soviet empire for disengaging from arms-control talks and other diplomacy. But it would be equally misguided now to imagine that the Russians do not mean what they say or to ignore their warnings of a danger of war. The United States must respond to what went wrong and what can be without sacrificing U.S. interests.

The writer is a serior associate at the Carnegie Endowment for International Peace. He contributed this view to The New York Times.

LETTER TO THE EDITOR

Chebrikov, Chernenko

Western news reports from Moscow on April 22 said that the head of the KGB, General Viktor Chebrikov, "has been promoted to the rank of marshal ... the highest rank to be held by a Soviet security chief since Stalin." This information produced lively speculation about developments in the Kremlin and a possible attempt to make the new head of the KGB the potential successor to Konstantin Chernenko.

In an opinion column (IHT, May 15), Leopold Unger stated: "Last month, Mr. Chebrikov was promoted to marshal. The last KGB marshal before him was Lavrenti Beria — the man who invented the 'doctor's plot." But the notorious, anti-Semitic "doctor's plot" was Stalin's own initiative. This campaign involved does not matter that his critics' theo- the arrest of Beria's man, General

Survivors Tell How Squall Sank Ship Within Minutes

By Ronald Sullivan

New York Times Service NEW YORK -- Survivors have described how a hurricane-force wind "from out of nowhere" capsized the sailing ship Marques north of Bermuda just when the crew believed they had successfully weathered an Atlantic storm.

With 18 crew members below deck, the ship skidded along on its side, then knifed under when its bow fell below a huge wave. It disappeared within minutes, the survivors said Monday. They said they doubted that any of the 18

would be found alive. One body was recovered from turns of the wheel but the rudder the water, nine persons were rescued from small rafts or the sea, sel was driven under. The incident, and 18 are still missing. The missing include the captain, Stuart A. Finlay, 52, of Lincoln, Massachusetts, his wife, Aloma, and their

infant son. Christopher. U.S. Navy and Coast Guard and Canadian vessels and rescue aircraft searched 40 square miles (about 100 square kilometers) of the Atlantic about 80 miles (about 130 kilometers) north of Bermuda Monday night without finding any further trace of survivors from the 117-foot (36-meter) British square-rigged bark. It had been racing with

41 other sailing vessels from Ber-muda to Halifax, Nova Scotia. "I'm still puzzled," said Mark Litchfield, head of the syndicate ture of the water was 71 degrees that owned the Marques. "It Fahrenheit (about 22 centigrade) seemed incredible that she was and that a person could survive in it driven under like that. She was very sturdy. It would have to have been a wind of absolutely phenomenal

China Supplies Workers to the World To Do Hard Jobs for Hard Currency

By Christopher S. Wren New York Times Service

WUHAN, China - When the Ethiopian government wanted a 180-mile (290-kilometer) highway cut through rugged mountains, it looked to the Chinese after no one

else would undertake it. Hundreds of Chinese laborers, toiling at heights up to 12,000 feet completed the highway in 33 months, although political unrest stretched the project out over five

The highway was built by the China Hubei Corp. for International Economic and Technical Cooperation. "Because our company's principle is to provide service, we don't consider danger or difficul-ty," said the China Hubei general manager, Wang Zhonghou. "If some other countries don't want to

accept it, we will undertake it." The corporation, based in Hubei province in central China, is one of the enterprises owned by central or provincial governments that are earning foreign currency by export-ing Chinese labor. An estimated 40,000 Chinese workers are employed on overseas projects, mainly in the Middle East and Africa, as

years ago.
While China says it sends workers abroad to promote friendship, such projects also generate money for China's own modernization and alleviate unemployment, which is unofficially reckoned at 9 percent

The corporation deducts the cost of airline tickets, room and board and taxes. Then it takes between 30 and 40 percent of what is left as a management fee. Mr. Wang said his workers were happy because their net income was still many times

what they could earn at home. In 1982, Chinese laborers building a power station in Hong Kong complained that 90 percent of their salaries were kept by the China Overseas Building Development Corp., one of the largest such companies, and that they got only a third of the food allowance paid by the Hong Kong subcontractor. The Beijing-based corporation said it

Orlov Reported To Be Ailing in Exile in Siberia

was not exploiting its workers.

New York Times Service NEW YORK — Yuri F. Orlov, the Soviet physicist and human rights activist, is in "very poor health" after serving a seven-year sentence in a labor camp in the Urals, according to Helsinki Watch, a group that monitors compliance with the human rights pro-visions of the 1975 Helsinki accord.

The group has reported that Mr. Orlov, 59, now serving an added five years of internal exile, "performed exhausting forced labor, lived on a near-starvation diet and males at the instigation of prison officials" while he was in prison Mr. Orlov's friends in Moscow gave Helsinki Watch photos that suggested that Mr. Orlov has aged considerably and lost most of his

teeth and a good deal of weight. Mr. Orlov was freed from prison in February and sent into internal exile in Yakutsk, in eastern Siberia, where his condition and food suppy had improved, the organization reported.

In May 1976, Mr. Orlov organized and became chairman of the Moscow Helsinki Watch group. It was forced to disband in 1982 after violations. He was arrested in February 1977 and was convicted of slandering the state in May 1978.

regarded as disciplined and docile, struction camps isolated from the They do not get to keep it all. local population. They do not speak the language and have little money to spend, because most of their income is paid directly to their families at home

Mr. Wang said China's Communist ideology posed no threat to a host country. "Our policy is that our workers are told that we work in a country with a different social system, we should abide by its sys-

tem." he said. He said those chosen to work abroad must be well-behaved, willing to work and in robust health. They are sent abroad on two-year contracts while the families stay home, although the workers are allowed one month's home leave a

Chinese labor export companies are sensitive about having their workers compared with the coolies who went abroad to do menial labor under miserable conditions in the 19th century. Mr. Wang said his workers volunteered in order to spread friendship, earn money for emselves and contribute to China's modernization drive.

Asked whether anyone went abroad to see the world, Mr. Wang said, "It's unavoidable, but it's not the main factor."

Swiss Mountain Deaths Rise

Russians Said to Take Strategic Afghan Valley

NEW DELH! - Soviet forces have sealed off the Panjshir Valley in northern Afghanistan and appear to have a firm hold on the strategic gorge, Western diplomats said here Tuesday.

Soviet troops blocked the main entrances to the valley and reportedly captured about 800 rebels in the latest offensive, but some fighting continued, the diplomats quoted reports from Kabul as say-

Soviet casualties also were said to be heavy, with several planeloads of dead and wounded flown

The reports added that the Soviet forces were building 45 encampments in the area to strengthen their control over the valley, a vital supply link to neighboring Pakistan for the anti-Communist Af-

ghan guerrillas. The reports could not be inde-

pendently confirmed. Earlier, Western diplomats had refuted the claim by the Sovietbacked government of President Babrak Karmal that it had regnined control of the Panjshir.

The 100-mile-long (160-kilometer-long) valley north of Kabul has been a rebel stronghold and symbol of the Afghan resistance since Soviet troops entered Afghanistan in December 1979, Soviet and Afghan government forces have mounted numerous offensives against the

valley, all unsuccessful. The latest attack began April 21. The diplomats, who spoke on condition they not be identified, said Soviet forces still have failed to

crush the guerrilla fighters there loyal to Ahmad Shah Massoud. Mr. Massoud, the best-known rebel leader in the Panjshir, evacuated most of his forces before the latest offensive began, the diplo-mats said. His whereabouts were unknown, but he reportedly was

preparing for a counterattack. Meanwhile, Kabul radio reported that Afghan government forces killed 50 insurgents in Somma Qala village in northern Jouzian province and that an unspecified number of people died in a rebel bomb attack on a bus carrying Moslem

worshipers in Kabul, The radio did not say when the clash took place.

INSIGHTS

A Soldier Remembers Utah Beach

By John C. Ausland International Herald Tribine

PARIS — As the time for the attack on Hitler's Europe approached, General Omar Bradley gathered in Exeter, in southern England, the officers of the U.S. divisions that were to make the assault landings in Normandy.

Bradley's purpose, no doubt, was to let us see the man who would command American ground forces. In the course of his talk, he sought to rouse us to the occasion by pointing out that we would have a front-row seat for the greatest military operation in history. For a few seconds, there was silence. Then a roar of laughter swept across the room.

Bradley looked about, clearly puzzled. A professional soldier, he was approaching the greatest moment in his career. Most of us, however, were civilians in uniform. We were well aware that we were about to participate in a historic event. We were also conscious, however, that a number of us would not witness the end of the first act of the drama about to unfold, let alone its final curtain.

When the 4th Division, which I joined two years earlier, went ashore on Utah Beach on June 6, 1944, I doubt that it ever occurred to me that we could fail. After several years of intensive training in the United States, the division went to England in early 1944. There we made a number of practice landings on the south coast at a place called Slapton Sands. This area was chosen because it was similar to Utah Beach and its hinterland.

As the level of training increased, so did the level of tension. Finally, the 29th Field Artil-lery Battalion, in which I was a 24-year-old assistant intelligence officer, moved to its assembly area near Dartmouth. Those of us who had already been informed of the plans for the landing briefed the rest of the battalion.

At last the day arrived when we went to our embarkation point in the River Dart. By that time, our battalion commander, Lieutenant Colonel Joel F. Thomason, had decided that several of us would go with him on the same landing craft as Colonel James Van Fleet. He commanded the 5th Infantry Regiment, which made the initial assault on Utah Beach.

Van Fleet's beadquarters for the crossing of the English Channel was an LCT (landing 'craft, tank), a flat-bottomed boat just large enough to hold four tanks. In addition to the boat's crew, the only person who got a cabin was Van Fleet. The rest of us made out as best we could on the open deck.

As we sailed from Dartmouth on June 4, we all assumed that the next morning would find us in France. We had not counted, however, on the weather, which, after we were at sea, turned foul. As a result of General Dwight Eisenhower's decision to delay the landing a day to allow the weather to improve, we found ourselves. bobbing around in the wind and rain for an extra night. Slowly but surely, seasickness took

 Even though I was one of the happy few who did not succumb, I was as relieved as the others to see the French coast emerge in the gray morning light of June 6.

All around us were the thousands of ships and landing craft that had made their way across the Channel undetected. The reason for

this, as we later learned, was that the Germans had not sent out their patrol boats, in the belief that no one would attempt a landing in such

Although we were too far out to make out what was happening on shore, the sound of loud explosions from aircraft bombs and naval shells left no doubt that the beach was an

As soon as Colonel Van Fleet got word by radio that the first waves had secured the beach and were moving inland, he announced that he

The run into the beach in a smaller landing craft, to which some of us transferred, was a bizarre experience. Most of us were happy to cower behind the little protection provided by the metal sides of the landing craft. One officer from regimental headquarters, however, insisted on sitting on a chair above us, where he was exposed to enemy fire. Arms folded, he announced that he did not want to miss a moment of this spectacular show. (A few weeks

When the landing craft hit the beach and the front ramp went down, I waded through some shallow water and ran to the shelter of the seawall that ran along the beach --barely glancing at several soldiers who were lying on the sand as though asleep. I could hear rifle and machinegun fire beyond the sand dunes, and some mortar shells fell not far away.

later, under similar circumstances, he collapsed with a sniper's bullet through his head.) When the landing craft hit the beach and the front rarm went down. I waded through some shallow water and ran to the shelter of the seawall that ran along the beach — barely glancing at several soldiers who were lying on the sand as though asleep. I could hear rifle and machine-gun fire beyond the sand dunes, and some mortar shells fell not far away.

My task, once ashore, was to guide our three artillery batteries to living positions that we had selected in England from a detailed foamrubber rehef map of the beach. After crossing the sand dunes that lay just beyond the seawall I was unable to figure out where I was. When I asked an infantry officer to help me, he laughed and said that the Navy had landed the first wave several thousand yards south of where we were supposed to land.

Fortuitously, Brigadier General Theodore Roosevelt Jr., who joined the 4th Division shortly before the landing, had volunteered to go in with the first wave. He later told some of us how he had gone forward to reconnoiter the beach: Finding that Major General Maxwell Taylor's 101st Airborne Division, which had dropped during the night, had captured the causeways over the inundated area behind the beach, Roosevelt decided that to try to move the landing northward would only cause con-

As it turned out, the Navy's error was fortunate. The beach on which we landed was much more lightly defended than where we were supposed to have landed, and the German stance was relatively easily overcome.

When I went back to the beach, I told Colonel Thomason that I could find only two firing positions, not three, in the limited area between the sand dunes and the inundated area. As calmly as if we were on a practice landing, he said, "It's all right. We'll only need two. B Battery hit a mine on the way in, and the landing craft sank."

Before I could think too long about the 60 men on that boat, Thomason told me to get moving and guide the two other batteries to their firing positions.

After the batteries were in position, Thomason suggested that we go inland to find the infantry. After crossing a causeway over the immdated area, we found ourselves in the middle of a field. We froze when we heard a soldier on the other side of the field shout, "Don't you fools know that you're in the mid-

After discussing our predicament, we agreed to separate, so that if one of us stepped on a mme, we would not both be blown up. It was a long way to the other side of that field. Discussing this incident not long ago. Thomason and I agreed that the soldier was right; We were fools. We should have had someone clear a path out to us with a minesweeper.

ate in the afternoon, after our batteries I moved inland to support the infantry, the clear, blue sky was filled with colored parachutes. From these were suspended boxes of supplies for the paratroopers. A colorful sight turned to horror, however, when gliders loaded with soldiers and equipment started to circle and land. Unnerved perhaps by German anti-aircraft fire, some of the pilots crashed their gliders into the hedgerows that surround the small fields of Normandy.

Whenever I recall that scene, I can still hear the terrible screams of pain that filled the air around me.

My last memory of that day is watching multicolored tracer bullets arch through the sky over Ste. Mère Eglise, which had been captured by our paratroopers but was still surrounded by German forces.

I fell to sleep well after midnight in a ditch by a road - a road that would lead us first north to the capture of Cherbourg and then south to the breakout from the bride St. Lo. After that, we participated in the liberation of Paris, the nightmare of the Hürtgen Forest and the crushing of the German mid-

After crossing the Rhine, we fought sporadic engagements until we found ourselves south of Munich. There we stopped simply because there were no more German units left to fight.

In days and under the protection of barrage balloons, Allied troops and equipment came ashore to fill Omaka Beach.

Broadway To Normandy

By Mary Blume

ARIS - One of the first women in the Normandy landings was a lanky redhead named Ruby Halliday who had been a Ziegfeld showgirl and a Patou model before becoming a master sergeant in the

Miss Halliday went from Paris to New York to join the Women's Army Corps at the start of World War II and was sent to London, where she worked in the secret map room at One Cumberland Place. Her job was to stick pins in the maps. "I'd go up on a ladder, just like in a shoestore," she says.

Everything around the map room was highly hush hush but she learned that her commander, an American major, was headed for a place called Ste. Mère Eglise and asked if she could go along. "No, no," he whispered, but he sent her along to the Military Claims Department, where it was decided that a WAC was just what was needed to do investigatory work on the

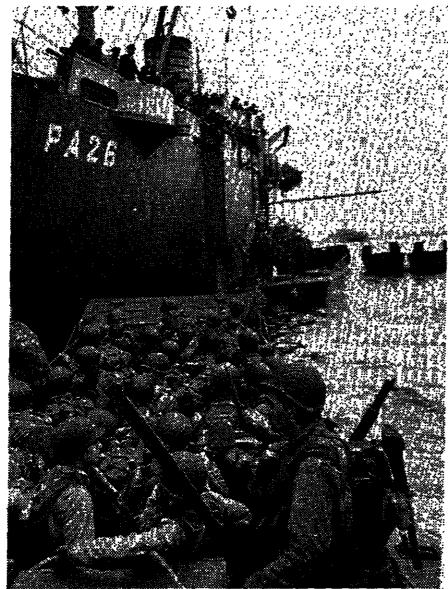

There was, in fact, another WAC, a part-Indian girl from the state of Washington whose name Ruby Halliday didn't get, on the British landing craft that took them through the night to Normandy. Miss Halliday says she was not frightened but then she clearly has nerves of steel: She had been ready to be parachuted into France although she had never been near a parachute. She was turned down at the last moment by a French officer who took one look at her and exclaimed "Ooh la la!" He wanted a parachutist somewhat less conspicuous than a blue-cycd redhead from Centralia, Illinois.

From Normandy, Ruby Halliday went to Paris, where she was promoted to warrant officer so that she could pursue investigations in civilian clothes. Most of the investigations had to do with flushing hidden Germans and collaborators. "I was supposed to be a stool pigeon." she says — "I didn't like that." She remembers a little French boy who was given chocoiate and spat it out: He had never tasted

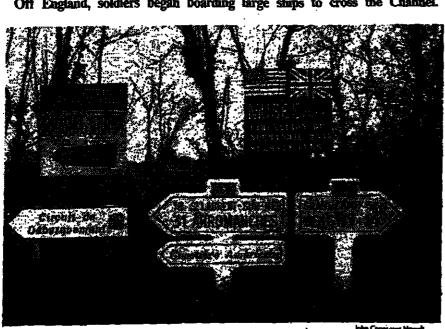

Ruby Halliday lives in Vence in the south of France and she celebrated her 80th birthday in May although she sounds decades younger. She was singing and dancing in "Rio Rita" on Broadway in 1927 when the couturier Jean Patou spotted her and asked her to come to Paris as a model. "He loved red hair and blue eyes," she says. As soon as she could get released from her contract with Florenz Ziegfeld, she was on the boat for France.

She has not been back to Normandy in the 40 years since D-Day although she can see the beaches more clearly in her mind than she

There was a lot of machinery on the beach, a lot of men with guns, water, the dust was rolling high, there were a lot of dead animals and those sticks." The sticks were hung with the doctags of fallen soldiers and planted in the sand next to the bodies, which had been lightly covered with sand while awaiting removal. They took off their jackets to cover their heads before they buried them, or so I was told." Ruby Halliday says. "I used to think of it but now I've put it out of my mind. I think

Off England, soldiers began boarding large ships to cross the Channel.

Normandy's roads are well marked for Wednesday's anniversary of D-Day.

Preparing for the Great Crusade

By Fred Farris

ARTMOUTH, England - All during that long, suspenseful spring 40 years ago, the buildup accelerated. We were young and it all was new and exciting. And we had a job ahead of us, a job underscored by this huge mobilization.

Thousands and thousands of tanks, half-tracks, trucks, jeeps and ambulances in their dun war paint covered the downs and woodlands of southern and southwestern England under trees or camouflage nets. Vast caches of ammunition in wooden crates were stacked under canvas tarpaulins or corrugated steel shelters along country roads where wildflowers sprang up. Millions of tons of weapons and ies were collected in the anticipated order supplies were collected in the authorized of their going into battle, with more coming daily in endless convoys from America.

Britain creaked under the load, and the much-repeated quip among U.S. soldiers was, Hell, if they cut loose those barrage balloons, this island would sink!" Along the English Channel, in rivers, harbors, inlets, more than 4,000 landing craft of every description were gathering, plus 1,213 Allied warships ranging from 7 battleships and 23 cruisers down to minesweepers, tugs and strange, long vessels holding thickets of rocket-launching tubes.

There were the large prefabricated harbors, code-named Mulberry, one of the secret weapons of Overlord, the coming invasion of France. These were floating segments of a huge outer breakwater and concrete caissons of an inner breakwater (some still visible off Arro-manches, in France) that would be towed to

Normandy and sunk to form artificial harbors. Supply was as critical a problem as the landing itself. As Harold White, now 84 years old and living in Dartmouth but then a British major on the invasion staff, puts it: "A division uses 2,000 tons of stores each day, and how the hell do you get them ashore? We had to solve

There were miles and miles of locomotives and railroad wagons strong along tracks in quiet valleys, awaiting duty in France. They were to replace rolling stock that Allied planes destroyed in numberless raids aimed at cutting off quick German reinforcement of coastal areas to be attacked.

An aerial fleet of 11,500 warplanes and 3,500 gliders had been marshaled and was busy: the long-range Fortresses and Liberators of the U.S. 8th Air Force and the Lancasters and Halifaxes and Libs of RAF Bomber Command continued to bomb Germany; the medium-range Mitchells and Maranders of the U.S. 9th Air Force and RAF hit roads, bridges, airfields and railways in France; and Mustang, Thunderbolt and Typhoon fighter-hombers attacked targets along the French coast.
The unarmed Dakotas of the U.S. 9th Troop

Carrier Command (my outfit) flew constant practice missions from bases in Lincolnshire and Berkshire, honing critically important navigational skills, towing Horsa and Waco gliders in ones and twos, while nearby their passengers-to-be — the paratroopers and glid-er infantry of the U.S. 82d and 101st and British 6th Airborne Divisions - sharpened their trench knives and carried out cross-comtry nighttime training exercises. Eighteen thousand of them were to be dropped in the darkness of D-Day morning. More than 3,000 were killed, wounded or missing in action.

There were so many airfields in Britain, in fact - 163 were built to add to many dozen long operational - that, as the late Cornelius Ryan observed in his book, "The Longest Day," a standard joke among U.S. aircrews was that they could tax their planes the length and breadth of the island without scratching a

Billeted in hundreds of camps throughout Britain were some 3.5 million men, 1.5 million of them Americans, the rest British, Canadians, Australian and other Commonwealth forces, plus men wearing shoulder patches of some of the overrun European countries: Infantry, artillerymen, engineers, tankmen, medics, signal men, supply and transport, mechanics, pilots, bombardiers, air sunners, Navy crewmen and officers, all awaiting the order to move out.

They, and the 150,000 who were to be put ashore on D-Day, had been brought together

From Dartmouth the English fleet of the Third Crusade gathered in 1190 to follow Richard the Lion-Hearted to the East. It was seven and a half centuries before the next Great Crusade, as General Eisenhower termed it, would leave from this scenic port.

in response to the simply stated order given General Dwight Eisenhower when he was named Supreme Commander, Allied Expedi-

"You will enter the continent of Europe and, in conjunction with the other United Nations, undertake operations aimed at the heart of Germany and the destruction of her armed

During the huge buildup, which was to reach a climax just four years after more than 300,000 British troops were pinned against the sea at Dunkirk and escaped their German attackers, Britain's southern coast was declared a military zone. Civilian movement was restricted, security clamped on any aspect of military matters, talk was guarded. By May 26, the actual assault troops were sealed in camps in marshaling areas, awaiting the order to board the invesion vessels.

Nothing of such magnitude as this assault on the heavily defended Fortness Europe had ever been undertaken from Britain. It is true that from this scenic port of Dartmonth the Second Crusade's international fleet sailed in 1147 for the Holy Land and the English fleet of the Third Crusade gathered in 1190 to follow Richard the Lion-Hearted to the East: But it was seven and a half centuries before the next Great Crusade, as General Eisenhower termed it, would leave from Dartmouth. This time, 485 American ships were poised in the River Dart

for the landing in Normandy.

Troops of the U.S. 4th Division funneled onto the concrete-block hard stands along the banks, destined to land at Utah Beach on Cherbourg peninsula's eastern shore. As it turned out, they were almost unopposed.

Soldiers of the U.S. 1st Division, sailing from Weymouth and Poole in Dorset, hit the beach code-named Omaha and met devastating resistance from German artillery left intact after the weather hampered aerial bombing. British Second Army forces who gathered for invasion of the three other assault beaches farther east - Sword, Juno and Gold - sailed from the Hampshire ports of Southampton, Portsmouth, Shoreham and Newhaven, with some vessels coming from as far away as Southend and Harwich on Britain's east coast.

T hese five great forces assembled off the Isle of Wight when the order finally came for a landing early in the morning of June 6.

Then they headed due south for France, in a 20-mile-wide (32-kilometer-wide) column consisting of 59 convoys totaling 5,000 vessels of every sort — channel steamers, fast attack transports, coasters, holiday cruise ships, tankers and the endless lines of landing ships, each with a barrage balloon attached as protection against any Luitwaife fighters that might dis-cover and attack the armada.

Ahead of the five slow-moving columns were the minesweepers, then the battleships and cruisers to bombard the German positions. Alongside the convoys were the protecting destroyers, corvettes and cutters, and overhead —during the daylight hours especially —was a vast shelter of lighter planes.

After nightfall on June 5, the airborne armada began loading up. First came the pathfinders with their electronic navigation gear and their specially equipped paratroopers with markers, radio beacons and flares to identify the DZs (drop zones) for the main body to follow and the LZs (landing zones) for the

great silent gliders carrying troops and their jeeps and light artillery. Near Newbury in Berkshire, General Essenhower visited paratroopers of the 101st just before they took off that night, chatting with the face-blackened young warriors, each loaded down with more than 60 pounds (27 kilograms) of weapons and gear, who were waiting to board their C-47s. As the Dakotas, each carrying 18 troopers, trundled down the field and into the air to join with many other craft of this largest airborne army in history, a tadio news reporter said later that there were tears in Eisenhower's eyes. Heavy casualties were ex-

Many - perhaps most - of the airborat soldiers missed their proper landing or drop zones partly because of anti-aircraft fire, partly from the lack of navigation crossbeams to pinpoint their DZs, partly as a result of smashed equipment that prevented some pathfinders from carrying out their mission

But these men were the first on the graded in Nazi-held France. The investor of Patients. Europa had begon. The Great Crisade under way.

International Herald Tribute D RAGUE - To what extent was the 19th-I century Czech composer Bedrich Smetana politically aware? Are his operas anything more than a quaint reflection of traditional Czech folk charm? To anyone who has seen Smetena's opera about Bohemian village life, "The Bartered Bride," such questions may seem academ-

ic. They are, however, pertinent to his first, little-known opera "The Brandenburgers in Bohemia," which was first performed in Prague a few months before the "Bride" in 1866 and has just returned to the repertory here after a gap of

On the surface the opera depicts historical events in the 13th century when the Czech homeland was occupied by German-speaking invaders from the north. But given the surge of nationalism in Bohemia at the time the opera was conceived, Smetana must have had contemporary events foremost in his mind and the point was not lost on the opera's first audiences.

The prevalence of German language and culture in Bohemia under the Austro-Hungarian empire was a yoke that Smetana deeply resented. In his childhood he had been taught at school how to write German but not his mother tongue; as a young musician, he learned that German was the language of opera in Prague, with Czech works performed only once a week. Even in his maturity, when he wanted to have a new composition published under a Czech title, he was told it would have to be German. So The Brandenburgers in Bohemia," depicting the overthrow of a cruel and corrupt occupying force, was a provocative manifesto foreseeing the day when Czechs would be free to determine their own destiny.

In the 100 years since Smetana died, the opera's message has lost none of its relevance. A design of the 1945 production at the National Theater, which is included in the exhibits at the Smetana Museum, shows the yoke in the form of a swastika and the red flag as a symbol of liberation. Then, following the Russian invasion of 1968, Prague audiences saw a new significance: the Act II scene in which an edict is pronounced expelling all foreign armies was greeted with such prolonged applause that the opera was quickly withdrawn. The work has pped back into the repertory under the cloak of this year's complete Smetana cycle, in a "bare

Given the nationalist ferment of his time, one might have expected a 19th-century composer like Smetana to have confined his material to a battle of oppressor versus oppressed, incorporating perhaps a subplot of tortured love. Smetana, however, introduces a social element, in which a corrupt Bohemian oligarchy is confronted with a populace willing to pillage in support of demands for legal and economic tice. Smetana was no more a democratic socialist than Wagner was a Nazi, but in his handling of the choruses and of the trial of Jira. who as leader of the people is wrongly accused of abducting three noble sisters, the composer makes it clear that he sympathizes with the people, one more reason why his credentials as Czech national composer have remained so im-

universal qualities.

terpoint - is a little old-fashioned, passing brough an easily-discernible pattern of recitative, ensemble and aria, but it is full of arresting instances where a corner is unexpectedly turned and attractive musical vistas open up. There is a good selection of principal roles, but it is as an ensemble opera that "The Brandenburgers in Bohemia" deserves attention

The production by Ladislav Stros resists the temptation to point up the work's allegorical possibilities. He uses a clear stage with atmospheric lighting and stark representational decor in the form of a series of suspended wooden gable-posts, allowing the transformations from high drama to lyrical reflection to be achieved smoothly. The choral scenes, conveying the physical mass of the crowd in both formal and essentials" production that stresses the work's spontaneously diverse movement, were magnificently sune, and Zdenek Kosler drew committed, sonorous playing from the orchestra. Apart from the jumbo-sized vibratos and out-

> dated acting style of the three female principals, and the usual lack of good tenors, the casting was successful. The most rounded character is a Bohemian collaborator, aptly named Tausend-mark, who was portrayed here by Ivan Kusnjer with a smoldering bass-baritone and shadowy profile. Smetana gave the role a beautiful aria in the final act (a last-minute insertion at the request of a friend who created the role) and the sentiments it expresses serve to humanize a type the composer must have found beneath contempt. As in "The Bartered Bride," "Dalibor" and his other operas where all the bad characters have redeeming features. Smetana could not suppress his benign view of human nature.

Scene from "The Brandenburgers in Bohemia."

Penderecki Conducts 4 of His Works in Paris

By David Stevens

International Herald Tribuni D ARJS - In its second Interna-Itional Orchestra Festival, the Théâtre Musical de Paris-Châtelet broke up its parade of orchestra showcasing — eight concerts, eight days, eight ensembles — with one program that concentrated on a living composer and his music.

The composer was Krzysztof Penderecki, who conducted four of his own works with the Krakow Philharmonic. The orchestra was founded only in 1945 and is closely associated with the works of Penderecki, who is also the rector of the city's music academy.

The reason such a concert could be included in a series otherwise devoted to virtuoso orchestras and mainly standard repertory is the 50-year-old Polish composer and his music. Penderecki won almost instant acclaim about 25 years ago as a composer who has, on the one hand, absorbed and exploited virtually all the advanced instrumental and vocal techniques, and on the other has found a relatively wide, international audience.

One of the reasons for Penderecki's appeal is that, even before his

music began to be identified with the "new romanticism," he has never strayed far from identifiable musical forms. The major work on Monday program, and the most recently composed, was the Violin Concerto, written in the late '70s for Isaac Stern. It is a big work in every sense, rewarding and de-manding for the soloist, with lush, soaring phrases riding above thundering cascades in the orchestra's deep strings, and including three knuckle-bending cadenzas. The Polish violinist Konstanty Kulka reveled in the fiddler's part, playing with rich tone, technical assurance and musical sympathy.

In the Partita for harpsichord, five amplified solo strings, and chamber orchestra (1972), the composer extracts waves of shimmering sound from raw material consisting largely of plucked notes. Elzbieta Stefańska-Lukowicz was the agile and intense harpsichord soloist.

The other two works on the program were the 1960 "Threnody for the Victims of Hiroshima," for 52 strings, the work that helped to bring Penderecki to international attention, and "Jacob's Dream," a brief 1974 work for orchestra.

As a conductor, the composer is a persuasive and straightforward advocate of his own music. He employs a vigorous, sweeping beat and incisive cues, made all the more convincing by his robust phy-sique and patriarchal beard. (He also holds the baton in his left hand gives a performance of towering strength and fascinating variety, so that even after five hours and 36 most of the time, which makes him a member of a very small fraternity years in her company I would hap-pily have started with her on Act of conductorial southnaws.

10. "Just your ordinary nine-act Earlier in this series of concerts, drama" noted The New York the Philadelphia Orchestra under Times when it first opened, while Riccardo Muti wound up its European tour with only half a concert. At the intermission, after Muti and the orchestra had delivered a highly polished performance of Franck's Symphony in D minor, fire broke out under the stage and after a long delay it was announced that the orchestra refused to continue, provoking moans of anguish from many in the packed audience who clearly had come not for Franck, but for Mahler's Symphony No. 1, eight acts to voice an icy distaste orchestra was following the advice of its doctor, who was perhaps particularly mindful of the lungfuls of air Mahler requires from brass and

> Remaining concerts in the TMP series are the Monte Carlo Philharmonic under Lawrence Foster with Radu Lupu as piano soloist, Wednesday: the FOK Symphony of Prague, doing the Dvorak Re-quiem under Jiri Belohlavek, Thursday, and the Philharmonia Orchestra of London, Vladimir Ashkenazy conductor and piano solo, Friday.

Legal Uncertainties Haunt **Venture Capital in France**

By SHERRY BUCHANAN

International Herald Tribune ARIS - Who will be the new generation of managers of venture-capital funds in France?

Doubts remain about

fund managers' taxes,

and responsibility.

stake, profits

With the French government sympathetic to the growth of venture capital and with the success of the "second market" - a French version of the U.S. over-thecounter market - during the past year, the environment for venture-capital funds in France has improved. More mediumsized young companies are issuing shares on the second market, an essential source of equity funding previously unavailable to small and young companies typical of venture-capital-fund port-

But there have not been any major rags-to-riches stories like those in the United States.

To date in France, manage ers of venture-capital funds have been bankers, with the exception of Alan Patricof Associes, an offshoot of the New York venture-capital fund. Through fonds communs de placement à risque, or FCPRs,

created about a year ago, a number of French banks — Paribas and Indosuez, for instance have offered their clients investments in nonquoted shares. But the French fund managers, unlike those in the United States and Britain, do not usually get involved in the management of the portfolio company. "It's not venture capital, it's more like an

open-ended mutual fund," one banker said. Large French industrial groups have no immediate plans to invest in French venture-capital funds. Because companies like Elf Aquitaine and Lafarge Copée are investing in venture-capital funds solely to get privileged access to new technology, they have concentrated their venture capital investments where they can find the technology they need — the United States.

"We are interested in high technology that presents a direct interest to our group," says Claude de Cointet, deputy director general of Inovelf, a subsidiary of Elf Aquitaine. "We hope that our \$50-million investment in venture capital in the U.S. will give us the leverage we need to get licensing agreements with our

T o fill the vacuum, U.S. venture capitalists are following in the footsteps of Alan Patricof Associes and planning to invest in venture-capital funds in France. These U.S. companies include TA Associates of Boston, which is already participating in a German venture-capital fund, Technoventure and Citibank.

But some questions remain about what life is like for the manager of a venture-capital fund in France. First, the French government stipulates that if investors in

venture-capital funds are individuals, the fund manager has to own 10 percent of the shares. That means a manager would have to make a personal investment of \$10 million if an FCPR is capitalized at the maximum of \$100 million. The idea is that the fund manager shares the risk with the investor. For that reason, Alan Patricof Associes has only institutional investors. To get around the requirement, sophisticated individual investors can

Another problem is the uncertainty about how the fund manager will be taxed. Under French law, the fund manager is entitled to 20 percent of the fund's appreciation but the money can be distributed only after a minimum of 10 years.

There is a big silence about how that 20 percent will be treated, as capital gains or as income for services rendered," says George S. Pinkham, a lawyer with S.G. Archibald in Paris. If the French government decided to treat the 20 percent as capital gains, it would be taxed at only 15 percent, but if it is treated as income for services rendered, it would be taxed at 70 percent. "Until someone collects the 20 percent, we can't be sure," says Maurice Tchenio, director of Alan Patricof Associes in Paris. "But, in my opinion, it will be treated as capital gains. That's why I started the fund."

Says Mr. Pinkham: "If U.S. managers start coming in, they're going to have to be reassured. There is nothing that Americans hate more than uncertainty.'

Another problem is that fund managers must wait at least 10 years to collect their 20 percent. "If you want to attract key people when they are 35, you can't tell them they il only get their money when they are 45." says Mr. Tchenio, "The whole point of becoming a fund manager is that you give up a large salary in a

Volcker **Backs IMF** On Mexico By Robert A. Bennett

New York Times Service

PHILADELPHIA - Paul A Volcker chairman of the Federal Reserve Board, has given his sup-port Monday to a plea by the head of the International Monetary Fund that the world's leading banks lower the interest rates they charge on loans to Mexico and give the country more time to repay its debts, according to banking

The recommendation came at a closed meeting of the heads of some of the world's largest banks, who are among those attending the annual International Monetary Conference here.

Mr. Volcker's position as head of the Federal Reserve goes a long way toward assuring a positive re-sponse by bankers to suggestions e might make. In addition, Mexico is well regarded by bankers be-cause it has substantially improved its financial condition.

Just before the meeting was held Monday, Walter B. Wriston, chairman of Citicorp - who has generally opposed concessions to Third World debtor nations — said at a news conference, "I believe there is linkage between the spreads and actual performance." In other words, if a country performs well, it deserves lower interest rates.

"Mexico's rates have come down substantially so far," Mr. Wriston

He estimated that interest rates on loans to Mexico had dropped by about a percentage point in response to the country's economic progress. It was unknown how Mr. Wriston reacted to the proposal to cut rates further; he has said in the past that he believes such declines should reflect marke: forces rather than requests by government.

Mexico has been paying about 1% percentage points above the banks' own cost of funds for its money, bankers said. It was not clear to what extent Mr. Volcker and Jacques de Larosière, the IMF's managing director, were seeking to have that lowered fur-

■ Mexico to Negotiate

Citibank said Tuesday that Mexico's bank advisory committee agreed to negotiate with pertinent Mexican authorities on arrangements for rescheduling Mexico's public-sector debt on a multiyear basis. Renters reported from New

ım Khodes

nior vice president, who is also cochairman of the advisory committee, said in a statement that negotiations would be compatible with Mexico's medium-term financial outlook. This approach should ease Mexico's plans for an early return to normal market access, Citibank said.

MANILA - President Ferdi-

nand E. Marcos issued a series of

decrees on Tuesday to float the

Philippine peso and tighten the government's austerity program in

what his office called a sweeping

The measures, effective immedi-

ately, also include increased taxes

on imports and restrictions on bor-

rowing by government corpora-

The sudden announcement was

made as the Philippines is still seek-ing agreement with the Interna-

tional Monetary Fund on \$650 mil-

lion in standby credits. A

negotiating team headed by Prime Minister Cesar Virata held talks

with the IMF in Washington last

month amid reports here that con-

ditions for the credits included a further devaluation of the peso.

Mr. Marcos has said he expected

move intended to speed up eco-

nomic recovery.

The Audi 4000 Quattro, bringing four-wheel-drive cars into the high-performance class.

Audi Promotes Four-Wheel Drive In Auto Market's Luxury Category

By John Holusha New York Times Service DETROTT -- Audi, the luxury car division of Volkswagen, is trying to change the image of four-wheel-drive cars from un-

gainly vehicles best suited for off-road use to sleek boulevard The experiment is too new to assess its success, but it is an indication of how technology is

replacing styling to differenti-ate car models, particularly at the higher-priced end of the The Audi system has already prompted imitations in Europe

and at least one U.S. company, Chrysler, has four-wheel-drive models under development. Early this year, Audi intro-duced its 4000 Quattro model in the United States. It resembles the older 4000S model on the

power-driven, instead of the osuaí two. Audi officials say the car is different from jeeps and other four-wheel-drive vehicles be-

outside, but all four wheels are

as conventional passenger cars, is always in four-wheel-drive operation and is not intended for off-road use. Unlike conventional four-

wheel-drive vehicles, which get significantly lower gas mileage when in four-wheel drive, the 4000 Quattro's rating is 21 miles (34 kilometers) a gallon in the city, only one mile a gallon less than Audi's comparable two-wheel-drive car, according to the 1984 gas mileage guide of the Environmental Protection

"This is a street car, a performance car," said Peter Fischer, vice president for Volkswagen of America's Porsche-Audi division. "All-wheel-drive gives a consistent handling response under all conditions. The advantage is greatest in ice, snow and rain, but we feel it handles

The 4000 Quattro, priced at \$16,830, is a toned-down version of Audi's \$35,000 turbocharged Quattro model, which

better even on a dry road."

cause it is as close to the ground has dominated international rallies for the past few years. Audi officials say they plan to make four-wheel-drive available in all models in the next few years.

> The success of what is known as the "big Quattro" has prompted imitations from Porsche and Mazda for rallies. Other companies are trying to decide if four-wheel drive is going to become a basic characteristic of higher-priced sports sedans, or is just an interesting technological exercise with limited appeal, like Mazda's rotary

Carroll Shelby, a former racing driver who now develops high-performance cars for Chrysler, is working on four-wheel-drive derivatives of the company's familiar front-wheel-drive sedans: "At some point you need four-wheel drive just to get the power to the ground," he said. "Above 200 horsepower, you can't do it with

BUSINESS ROUNDUP

Disney to Release Data

LOS ANGELES --- A federal judge has ordered Walt Disney Productions to turn over to financier Saul Steinberg all records relating to Disney's planned acquisition of a Florida real estate firm.

U.S. District Judge Terry Hatter Jr. on Friday refused to grant Mr. Steinberg a temporary restraining order preventing Disney from buy-ing the Arvida Corp. for \$200 million in Disney common stock.

Judge Harter, bowever, agreed on

Monday that Mr. Steinberg's lawyer had a right to view the documents regarding the sale.

Mr. Steinberg has complained that the purchase could block his attempt to gain control of Disney. Mr. Steinberg's family-owned Reliance Financial Services Corp., with interests in insurance, petroleum and real estate, is the largest holder of Disney stock with 4.1 million shares, or 12.2 percent of the shares outstanding.

Mr. Steinberg's attorney, Terry Christensen, said the Arvida acquisition was "solely to delay, discourage and prevent a takeover" and to entrench and perpetuate their

own control and management."
Mr. Christensen said Reliance would file a \$200-million suit

Compiled by Our Staff From Dispatches CLEVELAND — Cole National Corp. said Tuesday that it had agreed to be acquired by a group of investors led by Kohlberg, Kravis, The board said it was confident that progress will be sustained. Roberts & Co.

Under the agreement, stockholders will receive \$39 in cash for each Cole common share. The company has about 8,011,000 common shares outstanding. Cole's president, Jeffrey Cole, and certain other members of management will be given the opportunity to acquire as much as 21 percent of the resulting company, Cole said.

The acquisition could have a value as high as \$330 million. Cole National said the Cole family owns about 15 percent of its

outstanding shares.
In addition, Vendamerica BV, a subsidiary of Vendex International BV of Amsterdam, the holder of an 11.8-percent stake, has agreed to vote its shares in the trans the same way as the Cole family.

Cole National said Kohlberg Kravis had been granted an option to acquire 1,482,000 common shares at \$39 a share and about 923,000 shares of a new preferred stock at \$22 a share, which represents a total 16.4 percent of the voting power of the company.

The agreement is subject to shareholder approval and other customary conditions including an arrangement for necessary financing. Kohlberg, Kravis said all fi-nancing for the transaction will be insecured. Kidder, Peabody and Co. Inc. is acting as financial advis-

At the Annual Meeting held on April 30, 1984, the General Council of Banco di Napoli, presided by Prof. Luigi Coccioli, Chairman of the Board, approved the 1983 Balance Sheet of the Institution (the Bank and the Agricultural, Property, Industry, Public Works and Personal Guaranteed Special Credit Sections). The Institution, under the management of Prof. Ferdinando Ventriglia, set out its strategies, selecting and putting into effect operational policies which highly geared up its activities. These results are selfexplanatory: a vigourous growth in deposits, loans and investments in securities: the particular attention paid to the international sector increased from 20% to 31% the percentage of international lendings respect to total lendings of the Institution; a considerable increase in total earnings, while and notwith-

'That's the difference'

Today more than ever before, the profitability of your overseas business is affected by the speed and efficiency of your financial communications.

And speed and efficiency are precisely what Standard Chartered

Bank can offer you. The fact that we have 2000

branches in over 60 countries means that we can speed payments dramatically; allowing you to make more profitable use of funds.

The fact that we're an integrated and closely-linked network of offices staffed by specialists in international trade means that we can offer expert assistance in

solving problems no matter where they may arise; simply because we're used to dealing with them

And the sheer range of services we can provide (including roundthe-world foreign exchange dealing in 55 currencies through 18 locations, merchant banking in

eight financial centres, Eurocurrency lending, trade and project finance and local banking facilities) almost certainly means that you'd benefit substantially from a link with Standard Chartered.

Call us, and find out more. We think we can make a highly profitable difference to your international business.

TOKYO — Profits of major Japanese companies in the year ending March 31, 1985, are expected to rise an average of 21.7 percent from the level of the 1983-84 fiscal year, according to a survey released Tuesday by Wako Research Institute of Economy Inc.

In 1983-84, the same companies' profits rose 13.4 percent, the first increase in three years, it said. The survey covered 413 companies, excluding banks, insurance and gas companies, listed on the Tokyo Stock Exchange. 18.1d 394.7h 397.30 407.10 407.30 418.30 427,20 ASK 374.28 400.30 494.10 412.30 471.40 430.20 June 5 SP COMP. CANBERRA—Growth in Astralia's seasonally adjusted spir gross domestic product rose to 22 percent in the first quarter of 1984, up from 1.5 percent in the percent of 1983.

BUSINESS PEOPLE

Birk to Retire As Head of Merrill Lynch

NEW YORK -- Roger Birk said Tuesday that he will retire July 1 as chief executive officer of Merrill Lynch & Co., the largest securities firm in the United States, and that he will step down as chairman in July 1985, on his 55th birthday.

The board elected William Schreyer, 56, to succeed Mr. Birk as chief executive. Mr. Schreyer has been president of Merrill Lynch since 1982 and also is chairman and president of its principal subsidiary, the investment house of Merrill Lynch, Pierce, Fenner & Smith

Mr. Birk succeeded Donald T. Regan to the chairmanship of Merrill Lynch when Mr. Regan became Treasury secretary in 1981, The company said Mr. Birk had earlier indicated that he was considering retirement before reaching the age

Mr. Birk joined Merrill Lynch as a clerk in 1954. Mr. Schreyer began his career with the company in 1948 as a junior executive trainee. - The Associated Press

French Banks To Keep Officers

The French government has reccommended that the chairmen and chief executive officers of the nanaker of mass storage systems and
tionalized Saint-Gobain. Rhônecomputer products, said in a state-Poulenc and Paribas banking groups be reappointed to terms of three to five years. But changes were announced for state-owned

BOOKS

OVERLORD: D-Day and the Battle for Normandy

By Max Hastings. 368 pp. \$17.95. Simon & Schuster, 1230 Avenue of the Americas, New York, N.Y. 10020.

Reviewed by Drew Middleton

OVERLORD" will shock. It will shock those who regard the invasion of Normandy and the subsequent battles as triumphs of U.S., British and Canadian military heroism. It will shock those who see air superiority as the key to all victories. It will shock the patrons of Patton, the admirers of Montgomery and the idolators of Eisenhower

Max Hastings did not set out to revise the West's view of the events of June and July 1944. He does not write at the top of his voice. What he has done is to record in sober, balanced fashion the record of those months, and such is the impact of his record that few inter-ested in the subject will ever see it again in the complacency that marked the postwar works of generals and historians, official and other-

"It has been the central theme of this book," the author writes, "that the inescapable reality of the battle for Normandy was that whe Allied troops met Germans on anything like equal terms, the Germans nearly always prevailed." And, he continues, "The Allies in Normandy faced the finest fighting army of the war, one of the greatest the world has ever

It is difficult to fault Hastings on his facts; the book is thoroughly researched. The set-piece descriptions, the U.S. landings on Omaha Beach for example, are excellent. Recollections of the soldiers involved across the five beaches are well chosen and do not interfere with the reports of the tactical and strategic development of the campaign.

D-Day and the Battle of Normandy were the most significant military operations by the Western Allies in World War II. A great deal of self-congratulatory ink has been spilled by the participants in extolling their virtues. Hastings puts it all in perspective.

The prodigies of the American military-in-dustrial machine piled up thousands upon thousands of successful and tanks. It fed and equipped the infantry on a scale never before seen in warfare. It provided the utmost in communications. The same, to a lesser degree, applied to the British, whose Second Army in the Caen fighting had an enormous superiority in tanks. But Allied progress was slow and bloody. What went wrong? Hastings criticizes all the

armies involved. Few U.S. infantry units arrived at the front "with a grasp of basic tactics —a failure for which many men paid with their lives." Those British divisions expected to be the most formidable in battle, the Seventh Armored and the 51st Highland, did not measure up to their performances in North Africa and Sicily. The British were sensitive to casualties; this was the last army of the Empire.

The German weapons, despite their mini cal inferiority, were superior, especially the tanks, and the German tactics "masterly."

victory. Hastings does not think so. The Allied

The Allies began the campaign with air su-periority, and since then it has been military wisdom that this was decisive in the eventual

air forces, he concedes, smashed German air power over Germany and prevented the Germans from assembling sufficient forces for a decisive thrust.

The victory west to the Albes, the military glory to the Germans. There is a minutory sentence lowerd the end of the book that may

be read with profit by NATO military men: "For an example to follow in a future Ento-pean battle, it will be necessary to look to the German army, and to the extraordinary de-fense that its men conducted in Europe in the face of all the odds against them and in spite of their own demented Filhrer."

Drew Middleton is on the staff of The New

OBSERVER

'Good Heavens, Man'

By Russell Baker

taken leave of his senses again, which annoyed Colonel Wimpling.

In disgust, Colonel Wimpling because every time Archibald did shunned Archibald for the longest time. Now, though, Archibald had

taken leave of your senses?" hack novelists and screenwriters Have you taken leave of your were always putting into his mouth, senses? had not seemed so foolish as it had recently become. Take the time back in the Sudan when Archibald announced that he would single- a change of dialogue. He arrived handedly attack the Mahdi and early to watch Archibald prepare.

sieging Khartoum. That had been a good movie, and when the screenwriter ordered Colonel Wimpling to cry "Good heavens, man! Have you taken leave of your senses?" the colonel felt that the line, though a bit tired, was

entirely appropriate.

Then there had been the bestselling "Cockatoo of the Whipper-villes." In that one, Archibald had just declared that the murder of the entire Whipperville family, including its giant hound, was the work of an imported cockatoo under the hypnotic influence of a swami in faraway India.

n When the author asked Colonel Wimpling to cry "Good heavens, man! Have you taken leave of your senses?" the colonel could cry it

with conviction. Lately, though, Archibald's activities had caused the colonel constant embarrassment. In a television commercial one evening he had run into Archibald in a saloon, drinking beer with aging, overweight athletes.
"Good heavens, man!" he cried,

out of force of habit. "Have you taken leave of your senses? "Not yet," said Archibald, "but with a few more beers I'll be as out of touch with reality as that day I

charged the Dervishes at Khartoum_ One night the colonel learned ihat a laboratory in Patagonia was producing 50,000 clones of Joseph Stalin. Anticipating that Archibald was planning to attack single-handedly, the colonel went to Archibald's apartment to cry, "Good

heavens, man! Have you taken

leave of your senses?" When he arrived he found that

tan, was incapable of attacking EW YORK - Archibald had anything single-handedly except the neighborhood liquor store.

Good heavens, man! Have you asked him to a party. Sober, hardworking Colonel Wimpling attend In the old days this cry. which a party? "Good heavens, man!

п

Archibald said it might give him 100,000 murderous Dervishes be- First Archibald set out beer. "For aging, down-at-heel athletes," Ar-chibald explained.

Then came wine and whisky "That's for the over-50 upscale crowd. I've invited a lot of them," Archibald said.

Next Archibald set out trays of white powder. "Cocaine," he said. "For rich working athletes, Southern Californians, young upwardly mobile baby-boomers and children of the over-50 upscale crowd who attend fancy prep schools."

He laid out flabby cigarettes. "Marijuana," he explained. "For people too poor to afford the nose powder. And this," he said, pro-ducing an assortment of needles, is for the heroin people who prefer to sit in the corner and nod, and

"Good heavens, man!" cried Colonel Wimpling. "Have you taken leave of your senses?

"Stick around, old-timer," Archibald said. "Tonight you may be inspired to revise your lines."

Before the party was well launched Colonel Wimpling received intelligence that the entire human race was surrounded by nuclear weapons. He showed the message to the assemblage. It produced not a flicker of interest in charging

single-handedly or en masse.
"Good heavens, people!" he cried. "You have all taken leave of **VOUR SERISES!** And indeed they had. Colonel

Wimpling has gone to India to study the art of hypnotizing cockatoos to prey on American society, but not its massive hounds. In a rare moment of sensibility recently, Archibald said the colonel had taken leave of his senses.

OPPORTUNITIES

A Show That Bursts Out of Its Corsets

By Alan Levy nat Herald Tribune

TIENNA — This striking exhibition was conceived by a woman. Its 216-page catalog was written by 17 women (and one man). Its museum, the Hermes Villa, was a hunting lodge built in the 1880s for a woman: Franz Joseph's unhappy Empress Elisabeth. The exhibition itself is all about women and their emancipation in Vienna between 1848 and

"The Woman in the Corset" it is called. and, while two of the 20 rooms take the title quite literally, "it symbolizes the spiritual and psychological straitjacket we were in," says its creator, Reingard Witzman of the City of Vienna's Historical Museum, which uses the Hermes Villa for special exhibitions.

The Empress Maria Theresa and her daughters (including Marie Antoinette) all wore corsets. After the French Revolution, the corset yielded to loose, open, flowing clothes that gave the Viennese waltz its impens. But, in the 1830s, when industrialization reached Austria, the corset came with it -- for the middle- and upper-class ladies, anyway. It reshaped the female figure toward some false ideal beauty, with no regard for her comfort or health. Some had steel bands that pinched the waists and left women without enough air to breathe, which is why an awful lot of 19th-century wom-

en had kidney and respiratory troubles." More shocking to many risitors, however, is exhibit 169: fingertip formers, 10 metal implements (lined with rawhide) that ladies were to bed in order to stretch their fingers into the long

and slender digits their culture craved. Subtitled "The Life of Viennese Women Between Cliche and Reality," the show opens with a dazzling room of Jugendstil posters and contemporary color transparencies showing the exploitation of women's image to sell everything from bicycle tires, sewing machines, and shoe polish (a shoeshine boy winks at the public after looking up the crossed legs of a female client) to today's travel, cosmetics, cigarettes and fashion. The side wall, however, is a stark, provocative photo gallery of everyday Viennese women from the turn of the century, laced with such social comment as a picture of a bed rented in shifts --- by night to a seamstress, by day to a

bakery worker. Witzman and her partner, Regina Forstner, of the Historical Museum's fashion collection, in collaboration with a committee of 15 women and three men, have concentrated on contrasting clichés in color (or, at least, sepia) with reality in black-and-white. On a ground-floor TV set, 12 minutes of silent film

tootage show charming pictures of Vienna in 1908, while the voice-over commentary written by Witzmann notes that "in 1908, every fifth baby died in infancy."

One unsung revolution in the watershed year of 1848, where the exhibition begins chronologically, was an uprising of working women in the Prater, the Viennese amuse ment park and nature

preserve. Largely ditchdiggers from Bohemia. they noted against low wages and arbitrary layoffs. First the police and then the National Cauard were called in putting down the protest with a death toll of one woman and a dozen men, most of them sympathizers.

While the feminists manned the barricades, the 14-hour workday of the housewife and mother revolved around the three K's -Kinder, Küche, Kirche (children, kitchen, church) - and one room of the exhibition is an old-fashioned kitchen while another is a schoolroom. Connecting the kitchen to the corset showrooms is an indoor courtyard with laundry hung on a line ("no elastic," Witzmann notes) and a small display of washboards and basins.

The final room on the ground floor is a ballroom scene with the mannequins' gowns showing shifting silhouettes of the 19th cen-tury, decade by decade. Leaving this crinoline pavilion by climbing a grand staircase, one is greeted in the upstairs vestibule by a cheery assortment of busts: sculpted heads of aristocrats, feminists, actresses, washerwomen, milkmaids, and other female faces of the times. Also in the vestibule is a life-size mannequin mounting a bicycle. Alongside is a quotation from the feminist painter and writer, Rosa Mayreder (1858-1938), that the popularization of the bicycle in the mid-'90s gave women more freedom

that the entire women's movement had achieved. In "Women in Paintings," Hans Makart's overripe works in residence at the Hermes Villa have been welcomely alleviated with nudes by Schiele and Klimt and Eduard Stella's erotic

dancer (1909) as well as a pair of early Kokoschkas. After a brief view of some "scandalous" tennis and bathing suits of earlier times and a look at fingertip formers, one turns the dangerous corner of "Human Sexuality," the only disappointing section of the exhibition: a tinsel peopshow of Freudian symbols - fans, electric trains and stuffed cockatoos - reflected in such a way as to imply it was all done with mirrors

SUMPTUOUS PROPERTY outbuildings, 1500 sturn park Examplianal condition.

The ghost of a woman Frend might have liked to treat confronts one next, for her bedroom, unlike the rest of her villa, has not been redecorated for "The Woman in the Corset." The Empress Elisabeth (1837-98) did not come here often after losing her only son, Crown Prince Rudolf, in 1889 in another royal hunting lodge, Mayerling. But one has only to look at the ominous black bedstead and the walls garishly painted with scenes from "A Midsummer Night's Dream" to guess that this room once belonged to someone living a year-round nightmare.

With a breath of relief, one emerges into a room of art by Viennese women painters, most notably an 1882 depiction of the Prater by Tina Bian (1845-1916) and an 1892 Rosa Mayreder still life.

After a hall of photos and mementoes of women successful in other fields (including Alma Mahler, the actress Katharina Schratt; Baroness Bertha von Suttner, the first woman to receive the Nobel

Peace Prize), the conclud-ing section of "Woman in Corset" is in some ways the most savage. There is a room of women's work in cliché and reality: an omate diploma for seamstresses completing a twoyear course alongside a set of rules for women

working in a sweatshop (dress simply, no bright colors, no talking on the job, compul-sory overtime, meals allowed between 11:30 A.M. and noon if they don't slow production, and bring in four pounds of coal each a day to help keep the workplace warm).

A display of 120 different men's collars -"the male corset that women washed and ironed" - is around the corner from the most corsetlike exhibit of all: a wall chart telling when females in Vienna were first admitted to public high schools (1892), medical studies (1900), and technical, agricultural, law, and business schools as well as veterinary medicine (all 1919). Nurses, teachers and civil servants lost their jobs as soon as they mar-

The exhibition ends on a bittersweet note, personified by a woman streetcar conductor. The first World War, with its casualties and loss of manpower, opened many doors to women, and World War II broadened their range. But it has been only in the last decade that women were allowed to drive streetcars as well as punch tickets.

"The Woman in the Corset," Hermes Villa (in the Lainzer Tiergarten, a 5,300-acre nature preserve within the city of Vienna). A 20ninute walk from the Lainzer Gate, Wednesdays through Sundays and on holidays from 10 A.M. to 5 P.M. To Feb. 10, 1985. Admission

PEOPLE

Chimp Expert Gets Prize

\$50,000 J. Paul Getty Wildlife Conservation Prize for helping "mil-lions of people understand the importance of wildlife conservation to life on this planet." Goodall is best known for her pioneering research on chimpanzees in Africa. She has written several books on chimpanzees, and her work has been featured in films by the National Geographic Society. Born in England, Goodall has spent her career to searching primates throughout Africa. She lives in Tanzania, where she is based at the Gombe Stream Research Center. She is scheduled to receive the Getty prize at a ceremony in Washington later this month.

The British opera star Sir Geraint Evans ended his 36-year career at the London's Royal Opera House Covent Garden Monday night, singing his farewell in Italian to an audience that included Prince Charles. The Welsh miner's son then stood with his shoulders heaving with emotion as the entire Roy-Opera House chorus sang the Weish national anthem, with Prince Charles leading the many who joined in from the audience The 62-year-old barnone, who had pledged to retire from the stage this year "while my voice is still in good shape," had chosen Donizetti's opera "L'Elisir d'Amore" in which to appear in the last of his 50 or so operas at Covent Garden. Evans started his career at the Royal Opera House as the night watchman in Wagner's "Die Meistersinger" in January 1948, recruited by the late Sir Thomas Beecham. The burly singer went on to become renowned as Faistaff, Figaro and Loporello and was knighted by Queen Hizabeth II in 1969.

The Statier Brothers won four awards Monday night, beating rima for top honors at the 18th annual Music City News country awards in Nashville. The Statler quartet was honored for comedy act, top vocal group, single of the year for "Elizabeth," and No 1 television special for "Another Evening With The Statler Brothers - Heroes, Legends and last-minute request," Woodward Friends." Alabama, a four-piece said after the hearing. "I tried to band which has dominated country accommodate her, but with the armusic awards for three years, won two awards: band of the year, and ter, I couldn't."

Atlanth

The death of Musketeer, the last of 150 stray dogs who shared a multimillion-dollar inheritance from the estate of a Quaker Oil heiress, frees a \$12-million fortune for Aubum University's verennary school in Alabama, college officials said. The dog, believed to have been 18 to 20 years old, died over the weekend in a Japiter, Florida. kennel. It was the last of 150 pets owned by Eleanor Rischey at the time of her death in 1968. She willed her estate to Auburn's veterinary School, but stipulated that the fortune first be used to care for ber pets for 20 years or until their deaths, whichever came first. Rifchey developed an interest in Aubarn through her veterinarian. Dr. fran Fredrickson, whose son went to the school.

The wife of comedian John Belashi lost a court fight to prevent further distribution of a book about her late busband containing family photographs she said the publisher used without her permission. U.S. District Judge Norum Johnson denied Judith Belusin's request Monday for a temporary restraining order against the distribu-tion of 30,000 copies of the book Wired: The Short Life and Fast Times of John Belushi," written by Pulitzer Prize-winning reporter Bob Woodward of The Washington Post. The ruling was issued following a hearing on a lawsuit filed by Mrs. Behushi, in which she accused the book's publisher, Simon and Schuster, of copyright infringement for its unauthorized use of the disputed pictures. Woodward said Mrs. Belushi asked him to return the disputed photos only when she discovered the title of the book. By then, he said, the pictures had been laid out for publication. "It was a rangement with Simon and Schus-
